Hi [FirstName],

The Texas.gov Digital Identity Solution (TDIS) is now required for all CAPPS Users. This solution provides Multi-Factor Authentication (MFA), password synchronization, and Single Sign-On (SSO) access so you can securely access available services and systems.

A Texas.gov Digital Identity Solution account has been created for you.

Your userIDis: FirstName.LastName@agy.tx.gov

Enroll your Texas.gov Digital Identity Solution Account Now:

Step 1: Click this link to enroll your account: 123456

You'll be directed to the Texas.gov Digital Identity Solution to set a secure password. **NOTE:** This link only works for the one-time initial enrollment process. This link will not work as an access link for the environment.

Step 2: Once you've set your password, you will gain access to your account and have the opportunity to set up your security questions and MFA options. Use your new credentials to login to your organization's application(s) directly through the application login page or via your new, customized Employee Dashboard using Single Sign-On (SSO).

Please note: The enrollment link is only valid for one use and expires in 72 hours. Please contact your organization's CAPPS Delegated Admin should you require a new enrollment link, need assistance, or have questions about the TDIS account enrollment process.

Thank You.
