3188	Deployment	CAPPS Talent Mgmt	Yes	Recruit	High	Med	Jake Wofford	Rebecca Kelly	Enhancement	N/A	WorkInTexas applicant responses to requisition-specific screening questions	Agencies need a way to more easily identify applications submitted through (WIT). This will allow agencies to identify groups of applicants and send communications to complete any additional screening questions within CAPPS Recruiting. A new field, which will automatically update when an application is interfaced from WIT, will be configured. This field will be included in the grid view and could be used to filter/select only those applications. Additionally, a message template will be created that can be used to request the additional screening questions be completed.	Stacey Minces	1/19/2017		Need to identify candidates' job submissions coming to CAPPS Recruit from WorkInTexas.	Configure a user-defined field (UDF) in CAPPS Recruiting. When the WorkInTexas Applicant interface processes in candidates and their job submissions, it automatically updates the UDF to indicate that job submission as one that came from WorkInTexas. By configuration, include the new field in the grid for the list of candidates on a requisition. As part of an agency's business process, use the Send Correspondence feature to send an email from a new template to the WorkInTexas candidates requesting they log into CAPPS and complete the screening questions.	Approve
3189	Deployment	CAPPS Talent Mgmt	Yes	Recruit	High	Med	Jake Wofford	Rebecca Kelly	Enhancement	N/A	Allow multiple job codes and associated salary admin plan/grades on requisition, and indicate selected job code on job offer	In some cases, agencies have a need to post a job opening for multiple position numbers for a range of job codes/salary grades. Typically this occurs when a position may be filled at different levels within a career track or certification program based on the selected candidate's qualifications. New fields would be added on the requisition to capture all possible job codes/salary grades. A new field for the job code would be created on the offer to capture the actual job code for which the offer will be made. The additional job codes and/or salary grades will be displayed to the candidates on the job posting/career sections.	Stacey Minces	1/19/2017		Agencies have a need to post a job opening for a single (or multiple) position numbers for a single or multiple job codes and/or salary grades.	In order to capture the elements on the job requisition, new fields are desired. By configuration, the TM team may add new user-defined fields (UDFs) on the requisition to capture all possible job codes and salary grades. The job codes should not cross to another salary admin plan. A UDF for the job code is desired on the offer to capture the actual job code for which the candidate will receive an offer. Optionally, the additional job codes and/or salary grades can be displayed to the candidates on the job posting career sections, or the agencies should indicate the details in the job description and/or qualifications sections on the job posting.	Approve
3190	Deployment	CAPPS Talent Mgmt	Yes	Recruit	Low	Low	Jake Wofford	Rebecca Kelly	Enhancement	N/A	Change travel percentage options	Update configuration of the travel percentage label to indicate that the travel percentage values are "up to" or "less than" a certain percentage. The existing drop down values will stay in place (No / 10% / 25% / 50% / 75% / 100%), the label will change to clarify the percentage values.	Stacey Minces	1/19/2017		Agencies have a need to change the travel percentage options.	Update configuration of the travel percentage label to indicate that the travel percentage values are "up to" or "less than" a certain percentage.	Approve
3191	Deployment	CAPPS Talent Mgmt	Yes	Recruit	Med	Low	Jake Wofford	Rebecca Kelly	Enhancement	N/A	Additional screening steps in recruiting process	Adjust the Candidate Selection Workflow (CSW) configuration to add additional statuses in the HR Screen and HM Screen steps to facilitate the agencies tracking multiple screening levels.	Stacey Minces	1/19/2017		Some agencies require additional statuses in the HR Screen and HM Screen steps to facilitate the agencies tracking multiple screening levels.	Adjust the Candidate Selection Workflow (CSW) configuration to add additional statuses in the HR Screen and HM Screen steps to facilitate the agencies tracking multiple screening levels.	Approve
3192	Deployment	CAPPS Talent Mgmt	Yes	Recruit	Low	Low	Jake Wofford	Rebecca Kelly	Enhancement	N/A	Communicate job requisition cancellation to candidate	Create a correspondence message template that will be available for agencies to use to notify candidates that a job requisition has been cancelled. Agencies may edit the outgoing correspondence message to include specific details if needed, such as if the candidates will be considered for another job requisition.	Stacey Minces	1/19/2017		If a job requisition is cancelled the system should automatically notify the candidates.	Create a correspondence message template that will be available for agencies to use to notify candidates that a job requisition has been cancelled. Agencies may edit the outgoing correspondence message to include specific details if needed, such as if the candidates will be considered for another job requisition.	Approve
3193	Deployment	CAPPS Talent Mgmt	Yes	Recruit	Low	Low	Jake Wofford	Rebecca Kelly	Enhancement	N/A	Communicate screening/testing needs to candidate	Create a correspondence message template that will be available for agencies to notify candidates of upcoming screening or testing relating to a job requisition for which they are in consideration. Agencies may edit the outgoing correspondence message to include specific details of the screening or testing if needed.	Stacey Minces	1/19/2017		Some positions require additional screening/testing. For these position, the system should notify candidates of upcoming screening or testing relating to a job requisition for which they are in consideration.	Create a correspondence message template that will be available for agencies to notify candidates of upcoming screening or testing relating to a job requisition for which they are in consideration. Agencies may edit the outgoing correspondence message to include specific details of the screening or testing if needed.	Approve
3194	Deployment	CAPPS Talent Mgmt	Yes	Recruit	Low	Low	Jake Wofford	Rebecca Kelly	Enhancement	N/A	Communicate possible future consideration to candidates	Create a correspondence message template that will be available for agencies to use to notify candidates that they may be considered for future positions if they were not selected for the current requisition. Agencies may edit the outgoing correspondence message if needed.	Stacey Minces	1/19/2017		Create a notification to candidates that they may be considered for future positions if they were not selected for the current requisition.	Create a correspondence message template that will be available for agencies to use to notify candidates that they may be considered for future positions if they were not selected for the current requisition. Agencies may edit the outgoing correspondence message if needed.	Approve
3195	Deployment	CAPPS Talent Mgmt	Yes	Recruit	Low	Low	Jake Wofford	Rebecca Kelly	Enhancement	N/A	Change default view to only display submitted apps	Update the configuration so that recruiting and hiring managers only see completed job submissions in the candidate grid view; incomplete submissions would no longer display.	Stacey Minces	1/19/2017		Agencies prefer to view only the completed job submissions and do not want to see job submissions that are not complete.	A configuration setting controls whether or not the recruiting users can see the incomplete job submissions. To address this, the TM team can update the configuration (Taleo Recruiting Settings > Display Incomplete Application - Currently set to Yes, other option is No) to hide the draft submissions.	Approve
