

**CAPPS HR/Payroll
Enhancements (SRs) Submitted to User Group
09/25/18**

Voting Items:

SR #	Requesting Agency	Product	Impacts All Agencies	Module	Priority	Level of Effort	Short Description	Long Description	Synopsis of Request (Requirements)	Proposed Solution (How it would work/Customization Overview)	CAPPS Support Team Vote Recommendation
8506	DPS	CAPPS HR/Payroll	Y	Reports	Low	Medium	New dual employment query	Agency would like to run a query that shows any employees dually-employed at another agency.	The State Employees Employed By More Than One State Agency does not show SAD1 employees. Agency is requesting a simple query that shows all employees dually-employed.	Since Query Manager Won't allow agencies to view other agency information, I suggest we create a view that can, in turn, be used as a query.	Yes
5193	THECB	Talent Management	Y	Recruiting	Medium	Low	Hide Recruiting Icons - Progression and Selection	Request is to hide the Most Advanced Progression Status and the In At Least One Selection Process icons in CAPPS Recruit. This is the purple stair step icon that indicates that a candidate is in the selection process for at least one other active requisition and also the icons indicating the phase they have reached on a requisition.	Remove unnecessary icons from the system as many places as possible. The icons for Internal Candidate, In at Least One Selection Process, Most Advanced Progression Status, and Referred Candidate should be removed.	Update configuration to remove these indicators from list formats and the file indicator configuration: Internal Candidate, In at Least One Selection Process, Most Advanced Progression Status, and Referred Candidate icons. Note: The icons will remain on the candidate/job submission cards.	Yes
7176	DPS	Talent Management	Y	Recruiting	Low	Low	Application History Categories	Would it be possible to configure the History tab of the candidate's application to automatically show all 12 event categories instead of 4 out of 12 by default? Then at the recruiter's discretion, they can click the 'Modify' button to uncheck any event categories that they do not need displayed. Attached are screenshots of what we're referring to.	Automatically view all event categories when viewing a candidate/job submission's history. Today, four categories are automatically selected and the other categories can be selected by choice. The four categories that are configured to default currently include Attachments, Candidate Progression, Comments, and Offer.	Update the configuration for the Default History Event Categories to include all categories. Note: This will effect how quickly the data will load, as it will take longer to display items for all categories than the four it currently displays.	Yes
8447	RRC(455)	Talent Management	Y	Reports, Recruiting	Medium	Low	Requisition Details Report	Change the existing CAPPS Recruit report titled "Requisition Details Report" to include the Position Number text box.	Add Position Number to the Requisition Details Report.	Update report to add Position Number to the Requisition Details Report.	Yes
